

## WHO Countries/territories/areas reporting autochthonous dengue cases (November 2022- November 2023) \*

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

Data Source: World Health Organization, European Centre for Disease Prevention and Control  
Map Production: WHO Health Emergencies Programme  
Map Date: 8 December 2023

21.05.2023
